## DRAINAGE AND IMPERVIOUS COVER

11. Finished floor elevations shall be a minimum of eight (8) inches above finished adjacent grade.
12. The landowner is prohibited from constructing any improvements within any "Variable Width Private Drainage Easement" on this plat. Landowner may clear underbrush and establish foot trails within these "Variable Width Private Drainage Easements" but no vertical improvement development is allowed, except for driveways, culverts, and/or drainage improvements necessary for access to the lots. Fencing is allowed along the property lines allocated within these "Variable Width Private Drainage Easements" but with provisions not to impede the flow of storm water within the "Variable Width Private Drainage Easements".
13. "Variable Width Private Drainage Easements" shall be maintained by lot owners and/or home owners association and shall not be maintained by the City of Huntsville or Walker County.
14. The natural drainage channels (whether or not they are within a dedicated "DE" or "VWDE") that are located within various lots and unrestricted reserve areas throughout this subdivision may not be altered in any way. Landowner may clear underbrush and establish foot trails within these natural drainage channels but no vertical improvements/development will be allowed within forty (40) feet of the centerline of the natural low. All lots and unrestricted reserve areas within the subdivision and the owners thereof must continue to accept all existing drainage flows and drainage structures in place or proposed at the time of development which are a part of or necessary to the public roads infrastructure or public system of drainage in addition to all natural flows of water entering onto or crossing the property. Local approval or consent must be given by the City of Huntsville and/or Walker County Engineer in writing prior to alteration of the drainage infrastructure herein described. It is the responsibility of the lot owners to comply with any regulations or limitations noted, and permits issued by the City of Huntsville and/or Walker County for development do not act as a waiver or variance of the lot owner's responsibility to provide for excess runoff and drainage created by the permitted development.
16. All Drainage Easements labeled as "DE" are typical right angle off of right-of-way.
17. Before development of a Reserve Tract, a plat of the tract shall be submitted to the City for review and approval according to the Development Code of the City of Huntsville.
18. Based on calculations made from available data, the land owner may construct impervious cover (structures, driveways, sidewalks, etc.) improvements up to a "total square footage" equal to ten (10) percent of the total lot area. If the Lot Owner desires to exceed the area of impervious cover established for each lot as herein described, further study will be necessary and "on-site" storm water detention facilities may be required to accommodate the additional impervious cover desired. The study and possible incorporation of storm water detention facilities shall be submitted to the Walker County engineer for approval and must comply with all current local, state, and federal regulations including the Walker County Subdivision Regulations.
